

This model is mounted on a base plate 200 x 125 mm approx. which also carries a hand-drive pulley about 125 mm diameter coupled to the smaller dynamo pulley by a rubber belt to give a step-up ratio. Electrical output is via a pair of 4mm sockets and a light emitting diode is provided as simple output indicator. The model may also be used as a motor on 6 - 12 V DC supply.

- Electrical output via 4mm terminals
- Hand powered

May also be a motor powered by 6 to 12V power supply

\*Standard packing: Paper box
